I welcome you to the University of Delaware Botanic Gardens’ spring plant sale. The plant sale is a fun event for all that heralds the onset of spring each year. I think you will find many choice plants in the catalog listings and find multiple options for all of the needy spots in your garden. We have included cultural information to aid in your selection of plants and recruited very knowledgeable individuals to assist you at the sale.

The plant sale is a significant event in many ways. It is a great opportunity to learn about and obtain exciting plants for the garden, to interact with a group of energetic and experienced volunteers at the sale, and to support the UDBG. Your support is a vote of confidence in the gardens, its mission and the sponsored activities throughout the year. I hope you participate and find the days’ activities energizing and infectious. Please join us and revel in the prizes that you will bring home to launch your garden into a new year.

The goals of the sale are to educate consumers about new plants and to broaden the public’s appreciation of the variety of plants available by offering unusual and difficult-to-find plants. As consumers learn about these outstanding plants, and growers develop propagating stock, many of these plants will become part of the plant palette available through the commercial trade.

We hope you enjoy the UDBG’s plant sale offerings!

Dr. John Frett
University of Delaware
Botanic Gardens Director
Plant Sale
All events are located inside the fenced-in area across from Fischer Greenhouse on the University of Delaware campus (north of the University of Delaware football stadium, adjacent to the Blue Ice Arena). The plant sale is organized by the Department of Plant and Soil Science faculty, staff and students in conjunction with the UDBG Friends and volunteers.

Pre-order Plants Deadline, Monday, April 9, 2007
An order form is available in this catalog (see page 15) and on-line at: http://ag.udel.edu/udbg. Please complete the form and mail to the address listed on the form.
Pre-orders may be picked up on Friday, April 27, 8-10 am (members only) or 2-7 pm, and on Saturday, April 28, 9:30 am-4:00 pm in the “Pre-order Pickup” area. Additional plants may be purchased during these times. UDBG Friends' members receive pre-order priority; otherwise pre-orders are processed in the order received. Plant numbers are limited so we encourage you to send your order in early and/or join the UDBG Friends. Orders cannot be shipped; all pre-orders must be picked up.

Catalog on the Web
The plant sale catalog is available on the Web at: http://ag.udel.edu/udbg/events/annualsale.html
Plant orders cannot be accepted on the Web. All pre-orders must be mailed with an enclosed check to the address indicated on the order form. Credit cards will be accepted at the sale.

Benefits of membership in the UDBG Friends
The UDBG Friends' members-only admission to the sale will be Friday morning from 8:00 – 10:00 am. Those who join for the first time will receive a free perennial. UDBG Friends can pick up pre-orders and/or purchase plants during this time. To join, refer to the membership form in this catalog or call (302) 831-0153.

Educational Events
• Plant Sale Highlights
Tuesday, March 20, 7 – 9 pm, free and open to public
Location: Girl Scout building, located off College Avenue, adjacent to railroad bridge, and next to Townsend and Worrell Halls on the University of Delaware's Newark Campus.
The UDBG Friends generously sponsor a lecture highlighting plants featured in the plant sale. UDBG Director John Frett will present many of the plants offered in the catalog and at the sale. This is also an opportunity to ask questions about these plants and other garden topics. Refreshments served.
• Pruning Demonstration
Tuesday, March 27, 4:30 – 6 pm
$5 Friends Members; $10 Nonmembers
Location: Fischer Greenhouse
Master Gardener Clyde Roberts will provide an overview of pruning basics that will include when to prune, how to prune, equipment to use, and other valuable information. Then he will take you into the UDBG gardens and demonstrate how to properly prune on some of the plants that will be offered in the Spring Plant Sale.
Maximum: 20 people. Pre-registration required. Register on Pre-sale Pre-order form.
• Guided Walk of 2007 Plant Sale Highlights
Wednesday, April 18, 4 – 5:30 pm, free and open to the public
Location: Meet at Fischer Greenhouse entrance
Director John Frett will take you on a guided walk to show you UDBG landscape size plants that will be offered in the plant sale. Maximum: 35 people. Please call (302) 831-0153 to register.

PLANT SALE 2007 CALENDAR
Thursday, April 26, 5:00 – 7:00 pm
Patron Preview Sale and Reception
Friday, April 27, 8:00 – 10:00 am

Friday, April 27, 2:00 – 7:00 pm
UDBG Friends’ & Pre-order Pick-up Admission
Saturday, April 28, 9:30 am – 4:00 pm
General Admission
Lilacs
The Fragrance of Spring
Lilacs made their way to the U.S. in the early 1600’s with the colonists. Long among gardeners’ favorite plants, lilacs are cherished for both their floral display and fragrance. So alluring is the flower fragrance, it is often reproduced for perfumes. Early selections were limited primarily to the common lilac, but the fragrance and floral display were stunning even then. Pyramidal, upright clusters, called panicles, are typically produced on the end of the stems. Flowers range from white to various shades of lavender, pink-lavender, to pink, deep pink, and near red. There are both single and double flowered forms, any and all make a fine cut bouquet. When choosing one lilac over another, flower, color, fragrance, size, and timing should inform your decision.

Lilacs are easy to grow and show great versatility in the landscape. The only significant cultural factor to consider is extended periods of heat during the summer, which is not so much an issue in the mid-Atlantic region. Plants grow and flower best in full sun and moist, well-drained soils. In part shade, plants may show reduced flower production; in drier sites, plants demonstrate reduced growth. Several selections offered in the sale perform beautifully in these less-than-ideal-situations. Good air circulation avoids moist foliage, which can lead to powdery mildew, although this is more severe on earlier cultivar introductions. Most lilacs grown today have good to excellent powdery mildew resistance. Pruning lilacs helps reduce the incidence of mildew and provides for better flowering. The general recommendation for pruning of all lilacs is to prune after flowering, as lilac flowers on last year’s stems. When pruned in the early summer, new flowers will develop for the next year. Pruning late in the year results in the removal of some or all of the flowers for the coming season. When pruning the S. vulgaris and related types, select individual stems to be removed. First, remove some to most of the small sucker stems. Leave a few to replace older, non-flowering stems in the future. If plants are too dense, you may choose to remove some of the medium-sized stems, but keep in mind these will be the most productive stems. Finally, evaluate the older stems. Often they begin to dominate the plant but do not produce many flowers. If this is the case, they should be cut at ground level to make room for more vigorous and productive growth. Very old or overgrown plants can be cut to the ground to rejuvenate plants. Plants will re-grow stems and produce flowers depending on the species. In general, the shrubby species respond best to this type of pruning.

### LIGHT RECOMMENDATIONS

- ☀️ full sun
- ☀️ partial sun
- ☀️ full shade

### SOIL MOISTURE RECOMMENDATIONS

- ☀️ dry soil
- ☀️ moist soil
- ☀️ wet soil

These are broad guidelines, as plants often can withstand a wider range of conditions. Plants that prefer shade may grow well in full sun if there is adequate soil moisture during hot, dry spells. Similarly, plants that prefer moist soils may grow well in drier sites if some shade is provided, especially midday.

### Nativity

** [two asterisks] before the Latin name indicates plants are native to the Eastern United States. Cultivars of native plants are also considered native, as these are a selection from variants in the population.

---

**Lilac slice at Mt. Cuba. Photo credit: Rick Lewandowski**
**Carpinus fargesii**

A hybrid tree with flowers in early May. The leaves are light yellow with red veins at the base. This naturally-occurring hybrid tree is tolerant of drought and pollution. "Golden Globe" produces bright yellow leaves throughout the year, making it a great addition for any garden.

**Carya myristiciformis**

Selected for its narrow, upright form and early bloom, this tree produces abundant nuts that are a valuable food source for wildlife. "Golden Globe" produces bright yellow leaves throughout the year, making it a great addition for any garden.

**Aesculus × neglecta**

A lovely shrub or small tree with fragrant, clear pink flowers appearing in April. Originating at Fort McNair, Washington, D.C., it is hardy to 7a, so plant in a protected site.

**Magnolia acuminata**

One of the most deeply colored of the yellow hybrid magnolias. Three-inch flowers appear before the leaves do not have any significant fall color, so they are free from disease.

**Aesculus × neglecta var. tomentosa**

Native to southeastern and southwestern U.S., this adaptable plant can be grown as a shrub or small tree. The pure red flowers appear in late spring and contrast well against the foliage. The elegant, undulating leaves immediately brighten the autumn landscape. Rare in the trade.

**Magnolia x soulangiana**

A hybrid between the species Magnolia grandiflora and M. soulangiana, this plant produces large, fragrant, white flowers in late spring. The leaves are long and narrow, with a glossy texture.

**Ilex opaca**

The striking yellow fruit of this American holly cultivar will surely turn heads. The bright fruit against the very glossy, dark green foliage brightens the garden.

**Ilex opaca 'Nasa'**

A striking cultivar, native American holly is discovered in the community of Arden in the Allegheny Mountains. It is a medium to dark green with a nice luster that contrasts well with the plentiful red fruit.

**Ilex opaca 'Canary'**

This is a compact form of Foster's holly that maintains the distinctly narrow foliage and abundant red fruit. Plants mature at 8 to 10' tall and 4 to 6' wide.

**Ilex opaca 'Satyr Hill'**

A broad, oval shape of this cultivar is more rounded than that of the straight species, and it is a medium to dark green with a nicelayer that contrasts well with the plentiful red fruit.

**Magnolia 'Butterflies' Magnolia**

One of the most brightly colored of the yellow hybrid magnolias. Three-inch flowers appear before the leaves start to develop, making it a great choice for a small space.

**Magnolia 'Elizabeth'**

This is one of the first, and possibly the finest, of the yellow hybrid magnolias introduced by Brooklyn Botanic Garden. Soft, prunus-like, yellow fragrant flowers appear in late April, before the foliage. Cross between Magnolia 'acuminata' and M. denudata.

**Magnolia 'Galaxy'**

A 1992 winner of the Pennsylvania Horticultural Society Gold Medal Plant Award, 'Galaxy' offers striking, dark red-purple blossoms that appear in spring. Perfect for small gardens because of its narrow upright habit, Galaxy's sweetly fragrant flowers lightly perfume your garden.

**Magnolia 'acuminata var. subcordata' Miss Honeybee'**

This is one of the first, and possibly the finest, of the yellow hybrid magnolias introduced by Brooklyn Botanic Garden. Soft, prunus-like, yellow fragrant flowers appear in late April, before the foliage. Cross between Magnolia 'acuminata' and M. denudata.

**Magnolia 'Fordiana'**

An extremely rare evergreen magnolia with slender foliage, this plant produces erect, white flowers with red stamens that have a wonderful fragrance. Zone 7a plant, which means it requires some protection.

**Magnolia 'insignis'**

A very rare magnolia with stunning flower color beautifully offset by evergreen foliage. The flowers vary from deep pink to a deep purplish red, to a richly-hued dark red. This magnolia is hardy to 7a, so plant in a protected site.

**Magnolia × loebneri 'Leonard Messel'**

A lovely shrub or small tree with fragrant, clear pink flowers appearing in April. Originating at Nymans Garden in West Sussex, England, famous for its collection of rare plants.
**Latin Name** | **Common Name** | **Mature Size** | **Light** | **Soil** | **Pot Size, Plant Size** | **Price**
--- | --- | --- | --- | --- | --- | ---

**Magnolia (salicifolia × kobus)** | 'Iuler' | 20'Ø | 3 gal, 4-5' | $45.00

The magnificent pyramidal habit is seldom seen in American gardens. 'Iuler' offers starry white flowers borne abundantly in spring but differs from the species by virtue of the dramatic, red-tipped anthers.

**Magnolia sieboldii** | 'Colossus’ Magnolia | 10-15’Ø | 3 gal, 3-4' | $35.00

An impressive selection, this cultivar produces larger flowers than the species, up to 5 inches across, and often has blooms showing a semi-double or double nature. Nodding, ivory-colored flowers with magenta stamens—a true knockout.

**Magnolia sprengeri** | 'Diva' Magnolia | 30-50’Ø | 3 gal, 5-6' | $35.00

The erect, 8 inch, rosy-pink flowers create a delicate floral display in early spring. Blooms at a young age.

**Magnolia sprengeri** | 'Eric Savill' Magnolia | 30-50’Ø | 7 gal, 4-6' | $45.00

A seeding of 'Diva' originating at Savill Garden in England. An early spring flowering magnolia with large, 6 to 8 inch wide flowers with a heavenly scent. The showy, deep red-purple flowers produced on naked stems maximize floral impact.

**Magnolia stellata** | 'Centennial’ Star Magnolia | 25’Ø | 1 gal, 3' | $20.00

Commemorating the 100-year anniversary of the Arnold Arboretum of Harvard University, this magnolia has white flowers, lightly tinged pink, with more 'pets' than other selections. The more narrow, upright habit is distinct from other star magnolias.

**Magnolia virginiana** | 'Henry Hicks' Sweetbay Magnolia | 25’Ø | 3 gal, 3-5' | $35.00

Difficulty propagating this outstanding magnolia has greatly limited its availability in the nursery trade. This cultivar retains its foliage as well as or better than all other sweetbays. The upright habit, white flowers, and sweet fragrance make sweetbays an ideal choice for nearly all gardens. Tolerates poorly drained as well as drier soils.

**Magnolia virginiana** | 'Jim Wilson' Moonlight® Sweetbay Magnolia | 35-40’Ø | 1 gal, 3-4' | $25.00

Distinct in its narrower, more upright habit, and semi-evergreen foliage, plant sweetbay where you will enjoy the fragrant, ivory-colored flowers and lovely red fruits that the birds adore. Flowers in late spring and early summer.

**Platanus orientalis** | Oriental Planetree | 50-60’Ø | 3 gal, 5-6' | $35.00

A native of China, this large tree is the source of resistance to anthracnose for the common P. x hybrida. The flaking bark offers a colorful blend of creams and grey. Glossy green, large leaves are coarsely textured and deeply lobed.

**Quercus cocinea** | Scarlet Oak | 50-60’Ø | 3 gal, 3-4' | $25.00

Long considered one of the best native oaks for fall color, the red to scarlet foliage is spectacular. Superior to pin oak, scarlet oak does not have drooping lower branches. Acorns valued by wildlife.

**Quercus falcata var. jucundifolia** Cherrybark Oak | 70-100’Ø | 3 gal, 4-5' | $25.00

A moderately fast-growing variety of southern red oak which occurs as far north as the New Jersey pine barrens and southeastern Pennsylvania. Its common name refers to its bark, which is similar to that of wild cherry. An excellent timber tree with red fall color.

**Quercus ilicifolia** | Bear Oak | 15-25’Ø | 3 gal, 3-4' | $20.00

Native to the New Jersey pine barrens where it offers important cover and abundant acorns for small animals. This slow growing, compact and very drought tolerant oak is excellent for naturalizing or using in small gardens. Medicinal plant used by the Iroquois Indians.

**Quercus prinus** | Chestnut Oak | 60-80’Ø | 3 gal, 3-4' | $25.00

A member of the white oak group and native throughout much of the East Coast of the U.S. in habitats that often have rocky soils and are nutritionally poor. Leaves are evergreen toothed, and slightly reminiscent of the sharply toothed leaves of American Chestnut, hence the common name. Does well in dry soil.

**Robinia pseudoacacia** | ‘Umbraculifera’ Conforted Black Locust | 10-20’Ø | 3 gal, 5-6' | $35.00

Grown for its bold architectural form, this tree is best appreciated in the winter landscape when the foliage is not present. The first time I saw this plant was in New Gardens, London, England, where I stood for 15 minutes in the rain, in awe of its architectural form. Flowers are fragrant white and occur in spring.

## CONIFERS

**Abies nordmanniana** | Nordman Fir | 40-60’Ø | 3 gal, 1-2' | $25.00

Arguably one of the most elegant of firs, offering a statue-like, narrow pyramidal form and deep green foliage. Slow growing, but worth the wait.

**Calocedrus decurrens** | California Incense Cedar | 50-90’Ø | 3 gal, 2-3' | $25.00

This California native has an upright oval habit and maintains an outstanding green color in the winter. This is a good substitute for arborvitae as it is a good grower and is nearly immune to bag worms.

**Juniperus scopulorum** | ‘Blue Haven’ Colorado Red Larch | 20’Ø | 3 gal, 2-3' | $25.00

With striking blue foliage all year long, this pyramidal evergreen is great anywhere in the garden and useful as a screen. Its cones are also quite ornamental.

**Pseudolarix kaempferi** | Golden Larch | 30-50’Ø | 3 gal, 4-5' | $25.00

Graceful conifer with very soft textured foliage and unique green to purpled cones. The foliage turns golden yellow before dropping in the fall.

**Taxus x media** | ‘Everlow’ Yew | 3-4’Ø | 1 gal, 1' | $20.00

A low growing spreader with dark green needles. Ideal for foundations or hedges, plus it is also resistant to wind damage.

**Taxus x media** | ‘Viridis’ Yew | 10-12’Ø | 1 gal, 1' | $20.00

The strikingly upright form can be used individually or repeatedly within the garden depending on the desired impact. The new foliage is bright yellow green and fades to a medium green during the summer.

**Thuja occidentalis** | ‘Holmstrup’ Eastern Arborvitae | 8-10’Ø | 1 gal, <1’ | $15.00

A good candidate for an evergreen hedge as the plants grow very narrow and tall, with a dense habit. Once established, 'Holmstrup' demonstrates good heat and drought tolerance.

**Tuja plicata** | ‘Grovepli’ Spring Grove® Western Arborvitae | 50-70’Ø | 1 gal, 1’ | $15.00

The tight pyramid habit makes this a useful large open shrub that shows good resistance to deer browsing. Fast growth, combined with a good dark green foliage color in the winter, and you have a real winner!

## SHRUBS

**Abelia chinensis** | 5-7’Ø | 1 gal, 2' | $15.00

The compact habit is a result of its variegated effect. A x grandiflora ‘Compacta’. The leaves are edged in silver to cream creating a plant that appears to always be in flower. The white fragrant flowers are produced through much of the summer and fall.

**Amelanchier x grandiflora** | ‘Autumn Brilliance’ Apple Serviceberry | 20-25’Ø | 3 gal, 5-6' | $25.00

An easy-to-grow small tree with abundant white flowers in April followed by delectable red-purple fruit relished by birds and saucy humans, who eat them as you would blueberries or bake into pies. Stunning red-orange fall color.

**Andromeda glaucophylla** | ‘Brilliantissima’ Red Chokeberry | 6-10’Ø | 3 gal, 3-4' | $20.00

An oldie but goodie. A hard-to-beat shrub based on cultural adaptability in the landscape. Add to this the white flowers in spring, followed by red fruit display throughout the winter, and bright red color in the fall and you have an extraordinary plant.

**Berberis x gardneri** | ‘William Penn’ Barberry | 4’Ø | 3 gal, 1' | $20.00

Dark and mounded, this low shrub’s best feature is its dark green foliage that turns bronze in the winter. Dark yellow flowers add attraction in the spring.

**Buddleja davidi ‘Adokeep’** | Adoins Blue™ Butterfly Bush | 4-5’Ø | 1 gal, 2' | $15.00

Fragrant, dark blue-violet flowers, silvery-grey foliage, and a compact nature make this plant very useful in the perennial border. One of the English Butterfly Series™, ‘Adoins Blue’ blooms mid-summer to fall.

**Buxus** | ‘Green Velvet’ Boxwood | 4’Ø | 1 gal, 1' | $15.00

Of hybrid origin, this compact cultivar is slow growing and will not require much pruning in the landscape. Selected for its small green foliage that maintains good green color through the winter.

**Buxus microphylla** | ‘Faulkner’ Boxwood | 2-3’Ø | 1 gal, 1’ | $15.00

Well behaved, evergreen shrubs are always difficult to find. This boxwood selection is ideally suited for use as a compact hedge or in a tight corner due to its small habit.
**Clethra alnifolia** ‘Sherry Sue’
Redemption Summersweet

New stems are bright pink-red throughout the growing season, complementing the fragrant, pink flowers. Blooming when little else is.

**Clethra alnifolia** ‘Ruby Spice’
Summersweet

Arguably one of the best of the pink flowered cultivars prized for its fragrant, non-fading, ruby-red flowers that bloom in late summer. Plants may also be more compact than other pink cultivars.

**Comptonia peregrina** Sweetfern

Sweetfern fries nitrogen to allow it to thrive in sandy soils. The fine-textured foliage is fragrant when crushed or brushed up against, and reputedly, an aid in the relief of poison ivy rashes.

**Cornus kousa** ‘Autumn Rose’
Kousa Dogwood

15-25’

1 gal, 3-4’

35.00

Fall foliage changes from a light green in the summer to various shades of pink and red resulting in the cultivar name. The flower bracts mature to a soft white to yellow or lime green in the late spring and early summer.

**Cornus kousa** ‘Big Apple’
Kousa Dogwood

4-6’

1 gal, 7-4’

45.00

Introduce by the Polly Hill Arboretum, ‘Big Apple’ is an appropriate name in several ways. The fruit are exceptionally large, up to 1/4 inches, and the white bracts measure 5 to 6 inches across. The colorful exfoliating bark and excellent red fall color are similar to the species.

**Cornus kousa** ‘Hannos’

Radiant Rose’
Kousa Dogwood

4-6’

1 gal, 7-4’

45.00

The quest is on for a pink flowered Chinese dogwood and this plant results from that pursuit. The flower bracts are pink, the cooler the spring, the deeper the pink. ‘Hannos’ is slightly smaller with a more upright growth habit than other pinks.

**Cornus mas**

Japanese Cherry

Pomegranate

20-25’

1 gal, 6-7’

55.00

Just when you think winter will never end, Cornelian cherry’s bright yellow flowers herald spring. March flowers cover the naked stem and may well be the first shrub to flower in your garden. Flowers are followed by bright red, edible fruit, about the size of a cherry.

**Cornus sanguinea**

Winter Flame Dogwood

8-10’

1 gal, 1-2’

20.00

The 2-inch clusters of white flowers in the spring to early summer are followed by fruit which is usually consumed by the birds. Winter stems appear as if in bloom, with fiery-orange bases that transition to yellow, pink, and red as you move up the stem. Fall color is a handsome golden yellow.

**Cornus x californica**

Pickett Pink

Buttercup Winterhazel

4-6’

1 gal, 1-3’

25.00

The smallest and most graceful of the winterheals and difficult to find in the trade. The pale yellow flowers are produced in the early spring before forsythia. Summer foliage is a distinctive bright green with prominent bristle-tipped teeth.

**Cornus x stolonifera**

Pickett Pink

Beech Winterhazel

4-6’

1 gal, 3-5’

35.00

Flowering year round, winterhazel will enchant in early spring before little else is in bloom. Bare branches glow with clusters of pendant, pale yellow flowers, sweetly scented. As flowers fade, pretty leaves unfurl. A wide-spreadling, twiggy shrub with an attractive zig-zag habit of growth. Cut branches early to bring inside and force.

**Cotinus coggyria**

Golden Smoketree

8-15’

2 gal, 3-4’

20.00

Golden Smoketree

The bold yellow-gold foliage suffused with lime-green, holds its color even in full sun. Plants can be cut back regularly to reduce the height and maximize the foliage color. Fall color includes amber, burgundy, scarlet, and green. ‘Smoke Puffs’ created by fusing flower clusters.

**Cotinus obovatus**

Golden Smoketree

10-15’

1 gal, 3-4’

25.00

This hybrid between the European and American smoke trees has a lot to say for itself. Leaves emerge in spring a light red, darken throughout the summer, and in fall erupt into fiery red with orange highlights. Frothy pink panties are 14 inches high and 12 inches wide. Can be cut back to the ground in late winter and grown as a cut-back shrub.

**Cotoneaster horizontalis**

Pendulous Cotoneaster

1-5’

2 gal, 3-4’

20.00

Prostrate shrub with very dark green leaves and pinkish red flowers in the spring. Plants are typically semi-evergreen in the mid-Atlantic region. A great addition in any rock garden, it is also very adaptable.

**Daphne mezereum**

February Daphne

Daphne

2-4’

1 gal, 1’

25.00

This hybrid between the English and American smoke trees has a lot to say for itself. Leaves emerge in spring a light red, darken throughout the summer, and in fall erupt into fiery red with orange highlights. Frothy pink panties are 14 inches high and 12 inches wide. Can be cut back to the ground in late winter and grown as a cut-back shrub.

**Daphne mezereum**

‘Carol Mackie’

Burlwood Daphne

3-4’

1 gal, 1-2’

25.00

In spring, deliciously fragrant white flowers open from pink buds. Cream-colored leaf margins provide added interest. Deciduous daphne with good cold hardness. If you’ve heard its tough to keep daphnes alive, this one’s a clinch to grow...

*Kalmia angustifolia* Lamblck Kalmia 1-3’ ☀️☀️ 1 gal, 1’-2’ $20.00

A small version of the more common mountain laurel, this diminutive plant produces enormous flower clusters for its size. The evergreen foliage serves as a good backdrop for the white to pink flowers in May.

*Kolkwitzia amabilis ‘Maradco’* 

Dream Catcher™ Beautybush 6-10’ ☀️☀️ 1 gal, 2’ $15.00

Beautybush is an appropriate name, as the display of soft pink flowers in spring is magnifi-
cent! Often faulted for a lack of presence in the summer garden, this selection has yellow summer foliage and golden orange fall color.

*Leptodermis oblonga* Leptodermis 2-3’ ☀️ 3 gal, 1-2’ $20.00

A terrible common name but a fabulous plant. The small lilac flowers are produced in abundance from early spring into autumn. What they may lack in size, they make up for in number, longevity, and fragrance.

*Lespedeza bicolor ‘Summer Beauty’* 

Bush Clover 4-5’ ☀️ 1 gal, 1’-2’ $15.00

The numerous violet pink flowers are a show-stopper at a time when many plants are fading away for the year. Gracefully weeps to form a wide-mounded shrub.

*Lespedeza thunbergii ‘Eco Shiloh’*

Bush Clover 3-6’ ☀️ 1 gal, 4’ $15.00

The two-tone pink and white flowers that appear in mid- to late summer are unusual. Lespe-

*Lespedeza thunbergii ‘Pink Fountain’*

Bush Clover 6-9’ ☀️ 1 gal, 1’-2’ $15.00

The clear pink flowers are borne on arching stems in the latter part of the summer. Plants are particularly effective where branches can cascade over a wall.

**Leucothoe racemosa** Sweetbells 4-6’ ☀️ 3 gal, 3-4’ $25.00

Unlike the more commonly seen Drooping Leucothoe, this shrub is deciduous. But before the leaves drop in the fall they turn an attractive red. In early summer, white, urn-shaped flowers are profusely borne and easily appreciated. Forms colonies.

**Leucothoe recurva** Fetterbush 4-6’ ☀️ 1 gal, 1’-3’ $15.00

Some gardeners are disappointed when they learn that this shrub is deciduous, but when they see the gorgeous red fall color, this disappointment fades. Combined with the delicate white spring flowers, this is a fabulous plant.

*Lindera erythrocarpa* Spicehub 15-20’ ☀️ 3 gal, 4-6’ $20.00

The lemony fragrance of the bruised stems is always a give away that you are looking at spice-

*Loniceran var. rubrum*

Chinese Fligree-fower 5-8’ ☀️ 1 gal, <1’ $15.00

An evergreen shrub that flowers in February or March with vibrant fuchsia pink flowers and reddish new foliage! The only catch is that fringe-flowers require a protected site. The plant at

*Loropetalum chinense var. rubrum* ‘Fire Dance’

Chinese Fligree-fower 4-6’ ☀️ 1 gal, <1’ $15.00

A member of the witch hazel family with fuchsia pink flowers and ruby red new growth that changes to a luminous reddish purple. The intensity of the foliage color deepens in the cool weather of the autumn to produce an attractive display through the winter.

*Mahonia repens* Creeping Mahonia 1-1 1/2’ ☀️ 1 gal, 1’ $15.00

The prostrate habit of this plant makes it well suited to use as a groundcover, especially in partial or full shade. The evergreen foliage emerges with a maroon cast, turns bluish green through the summer, and then the foliage assumes a bronze hue in the fall and winter. Bright yellow flowers appear in the early spring.

**Osmanthus heterophyllus** Holly Osmanthus 8-10’ ☀️ 3 gal, 5-6’ $25.00

The evergreen foliage and ease of cultivation provide for a useful shrub. Plants are often used as short hedges, screens or evergreen accents in the shrub border. The sweetly fragrant, white flowers appear in the fall.

Osmanthus heterophyllus ‘Purpureus’

Holly Osmanthus 8-10’ ☀️ 3 gal, 2-3’ $20.00

The new foliage emerges deep purple in spring and fades to a green with purple hints in early summer. The intensity of the color returns with the cool fall and winter weather. Plants pro-

Osmanthus × fortunei ‘Variegatus’

Holly Osmanthus 8-10’ ☀️ 1 gal, 1’ $20.00

Borne and upright, this beautiful shrub can spice up a shrub border. Its evergreen leaves with creamy white margins are quite attractive all year long. Seldom seen, the tiny white flowers perfume the October garden.

**Osmanthus × fortunei** Fortune’s Osmanthus 15-20’ ☀️ 3 gal, 4-5’ $25.00

Rounded, upright, evergreen shrub with extremely fragrant white flowers in the fall. Holly-
lie, leathery, dark green leaves. Height can be controlled by pruning at any age.

*Parthenocissus henryana* Silvervine Creeper Vine 3 gal, 1-2’ $20.00

If you are intrigued by beautiful foliage, this vine is perfect. Blush-green leaves conspicuously veined with white, and sometimes pink in the center, turn bright red in the fall.

*Philadelphus × lemoinei* ‘Innocence’

Mockorange 6-8’ ☀️ 1 gal, 4’ $15.00

Mockorange is noted for the sweet fragrance of the flowers and this cultivar is one of the most fragrant. The nearly 2-inch white flowers will perfume your garden in spring. Leaves are sporadically variegated with creamy splashes.

**Philadelphus × lemoinei ‘Mannequin de Hermitage’**

Mockorange 3-4’ ☀️ 3 gal, 2-3’ $20.00

Renowned for its fragrant flowers in the spring, this mockorange cultivar also produces double white flowers that enhance the visual impact and is finer textured than the species.

**Physocarpus opulifolius** ‘Minda’

Copertina™ Ninebark 6-8’ ☀️ 3 gal, 4-5’ $20.00

Who needs flowers with foliage like this! New leaves emerge copper then deepen to red in sum-

er. Ninebark produces white flowers in late spring that contrast well with the dark foliage.

**Physocarpus opulifolius** ‘Nugget’

Ninebark 6-8’ ☀️ 3 gal, 5-6’ $20.00

Folilage emerges deep golden in spring, fades to lime green in summer, and turns yellow in fall. Plants produce white flowers in the late spring.

**Physocarpus ‘Seward’**

Summer Wine® Ninebark 5-6’ ☀️ 3 gal, 1-3’ $20.00

A ninebark cultivar noted for its deeply cut, wine-red leaves, and compact habit. Pinkish-white flowers in summer show up nicely against the dark leaves. Vigorous shrub that tolerates harsh conditions.

*Rhamnus frangula* ‘Ron Williams’

Fine Line™ Buckthorn 5-7’ ☀️ 3 gal, 3-4’ $25.00

This non-invasive cultivar is an excellent, responsible replacement for older weedy varieties. A distinctly upright habit and uniquely linear foliage give the plant a super fine texture.

*Rhaphiolepis umbellata* Indian Hawthorn 3-5’ ☀️ 1 gal, 1’-2’ $15.00

Listed as a zone 7b plant, the selection in the UDBG is 2 feet tall x 3 feet wide and 10 years old. It has survived in a protected site without injury. Small evergreen foliage accentuates the white flowers in spring and the dark blue fruit through the fall and winter.

**Rubus odoratus** ‘Fred Galie’ Arazela 5-7’ ☀️ 1 gal, 1’-2’ $20.00

Yellow-pink in bud, opening to 2/3-inch apricot flowers in late summer and early fall. A hybrid of Rubus odoratus arborescens × R. prunifolium, the deciduous leaves turn orange to red in fall.

*Rubus odoratus* 

Dahurian Rubodorend 5-6’ ☀️ 3 gal, 2-4’ $20.00

The rich, rose-purple flowers are a sure sign of its role as a parent of *Rubus odoratus* ‘PJM’. The foliage is semi-evergreen and acquires a purple tinge in the winter.

*Rosa rugosa* ‘Alba’ White Rugosa Rose 4-6’ ☀️☀️ 7 gal, 2-3’ $20.00

These rugged plants tolerate drought, ocean salts and exhibit good disease resistance. The fragrant, 2½ - 3½ inch white flowers are produced from June through August and continue sporadically to frost.

*Rosa rugosa* ‘Rubra’ Red Rugosa Rose 4-6’ ☀️☀️ 7 gal, 2’ $20.00

Rugosa rose is a rugged plant that tolerates drought, ocean salts and has good disease resis-
tance. Fragrant, 2½ - 3½ inch flowers are rose purple and are produced from June through August and continue sporadically to frost.

*Salix chaenomeloides* 

Giant Pussy Willow 10-15’ ☀️ ☀️ 3 gal, 3-4’ $20.00

Pearl-grey catkins emerge from maroon-red buds, then turn pink to smoky white. A vigorous shrub, cut branches throughout the winter to force inside to appreciate the unheathliness of the buds that reveal soft, silky “fur” beneath.

**Shrubs**

*Viburnum* carlesii 'Compacta'

*Viburnum cassinoides*

**Viburnum dentatum**

*Viburnum lantana* 'Rosea'

*Viburnum plicatum* 'Variegatum'

*Viburnum plicatum* 'Trenticolor'

*Viburnum rhytidophyllum* '

*Viburnum sessilifolium* 'Plena'

*Viburnum x bodnantense* 'Dawn Beauty'

*Viburnum x burkwoodii* 'Bremerton'
**Asclepias curassavica**

**Common Name**: Foliage adorned with creamy white plume-like panicles in late spring. Resembles the white airy shades or white. Compact plant self-sows when happy, but may go dormant if the summer is dry.

**Achillea**

**Common Name**: Attracts hummingbirds and butterflies. This plant is easy to grow and drought tolerant once established. Butterflies love it!

**Aconitum**

**Common Name**: Woodland gardeners just would not be complete without this deciduous, fine-textured fern. Fresh fronds are produced throughout the growing season so it looks great all summer. Easy to grow and will spread slowly if happy.

**Amsonia**

**Common Name**: It is hard to beat the beautiful foliage on this 2004 Perennial Plant of the Year. The fronds are silvery-gray-green with burlap-like texture. Perfectly the most popular fern, its vase-shaped arching fronds adds a touch of elegance to any shade garden.

**Alyssum**

**Common Name**: A vigorous upright grower that has creeping tendencies when grown in moist woodland situations. Red-stemmed, dark green fronds are supported by slowly spreading rhizomes. A hybrid between *A. felix-femina* and *A. aizoon* 

**Baptisia**

**Common Name**: The dark green leaves emerge on this slowly spreading groundcover. Electric deep blue, phlox-like flowers begin in early fall and are still present when the leaves start to turn a vivid mahogany-red fall color.

**Brachyglottis**

**Common Name**: Brilliant magenta, 2 inch flowers start in June and continue to frost. Palm-shaped, deeply cut leaves are carried on trailing stems that sprawl to form wide mats. Plants look terrific weaving through the garden or growing over walls. Plant where you want as poppy mallow don’t like to be mowed.

**Carex**

**Common Name**: Spectacular coarse dark green fronds that are semi-evergreen give this rare native fern a very attractive, grey-green feathered foliage topped with earth-toned flowers from June to September if deadheaded. The warm flower color is ever changing from salmon-peach to rust. Great for the woodland garden or as an accent with other spring flowers. The dark green foliage declines by mid-summer.

**Deutzia**

**Common Name**: A succulent groundcover with late spring, yellow-orange 1 ½-inch wide flowers that last about four weeks. Tries to be evergreen, picking up tints of red in the fall. Well-drained soil a must. 

**Dryopteris**

**Common Name**: The soft pink flowers in late summer through fall. Awesome for meadows and borders, this plant is easy to grow and drought tolerant once established. Butterflies love it!

**Geranium macrorrhizum** | Missouri native wildflower with tight clusters of tubular, deep-blue flowers in late summer. One of our showiest, most elegant late season woodland gems. Easily grown in moist woodland shade or along streams or ponds. | 6-8" | ☜ | 🌿 | 1 gal | $8.00 |

A low maintenance, aromatic groundcover carpet that retains its foliage well into winter. From late spring to midsummer masses of white, blushed with pink, flowers are held above the foliage. Outstanding burgundy fall hues. |

**Geranium × cantabrigiense 'Biolo'** | Bigroot Geranium | 6-8" | ☜ | 🌿 | 1 gal | $8.00 |

Quick spreading, semi-evergreen groundcover with aromatic 5-lobe leaves that turn scarlet in fall. Soft, pink flowers appear in May through June, sporadically thereafter. Tolerates a wide range of conditions, including drought, in sun or shade. |

**Geranium × cantabrigiense 'Karmina'** | Geranium | 8" | ☜ | 🌿 | 1 gal | $8.00 |

The flowers are dark pink, almost magenta. Tough, useful groundcover with delightfully fragrant foliage, which turns burgundy in winter. |

**Helianthus 'Golden Nugget'** | Sun Rose | 12" | ☜ | 🌿 | 1 gal | $8.00 |

Very drought tolerant, semi-evergreen sub-shrub with abundant show of bright golden-yellow blooms mid-May until late June. Use in rock gardens or containers; good drainage a must. |

**Helianthemum nummularium 'Wisley Pink'** | Sun Rose | 12" | ☜ | 🌿 | 1 gal | $8.00 |

Soft, pale pink, single blossoms with bright yellow centers May through June. Compact, woody perennial with blush-silver, semi-evergreen foliage. Plant on a sunny slope or let spill over a wall. |

**Helleborus nigra** | Christmas Rose | 12-15" | ☜ | 🌿 | 1 gal | $12.00 |

In January when everything else is frozen this evergreen perennial is in bloom! The 2-4" white flowers are sometimes tinged with pink and sit above the beautiful shiny dark green leathery foliage. |

**Hosta** | 'Gold Standard' | 18" | ☜ | 🌿 | 1 gal | $8.00 |

One of the most important hosta varieties in the world. The red leaf stems of this hosta nicely contrast with the lance-shaped, blue-green leaves, white undersides; entire plant forms an arching mound. |

**Hosta 'Rock Princess'** | Hosta | 4-6' | ☜ | 🌿 | 1 gal | $8.00 |

A low, tight clump of small heart-shaped green leaves with slightly wavy margins. Dark violet flowers in July. |

**Hosta 'So Sweet'** | Hosta | 14" | ☜ | 🌿 | 1 gal | $8.00 |

A beautiful variegated hosta with medium green leaves and a creamy margin. Forms a full round clump of lanced-shaped leaves and can be considered sun tolerant, with enough moisture. Sweetly fragrant purple-striped white flowers appear in mid summer. |

**Hosta 'Stripes'** | Hosta | 20" | ☜ | 🌿 | 1 gal | $8.00 |

2005 Hosta of the Year. Stripes is a mutation of ‘Gold Standard’. Heart-shaped leaves are chartreuse with a dark green margin. Very fine white streaks are scattered between the leaf center and margin. Violet flowers in July and August. |

**Hydrastis canadensis** | Goldseal | 12" | ☜ | 🌿 | 1 gal | $12.00 |

Seldom seen in gardens, the heavily crinkled leaves on this woodland herb add texture to the shady garden. Greenish white flowers appear in April or May followed by a fleshy berry that ripens in autumn to bright red. This vigorous native spreads by thick, yellow rhizomes which have long been used in herbal medicine. |

**Iris versicolor** | Blue Flag | 2-3' | ☜ | 🌿 | 1 gal | $8.00 |

Easy aquatic iris of eastern U.S. that is abundant in swamps or wet meadows. Large showy blue-violet flowers with yellow and white markings appear in May-July. The rhizomes have long been used in herbal medicine. This shallow water plant can be used in water gardens and bogs. |

**Kirengeshoma palmata** | Yellow Waxbells | 3-4' | ☜ | 🌿 | 1 gal | $14.00 |

Shrub-like, herbaceous perennial with lovely maple-like foliage. Late summer to early autumn waxy, tubular yellow flowers appear. An uncommon plant that adds an architectural touch to the shade border. |

**Lathyrus vernus s. roseus** | Spring Pea | 8-18' | ☜ | 🌿 | 1 gal | $14.00 |

Clump-forming, light green foliage loaded with soft pink pet flowers in spring. Much under-rated and underused spring perennial that is an invaluable and easy woodland filler. |

**Leucisca cotyledon** | Lewisia | 6" | ☜ | 🌿 | 1 gal | $8.00 |

This charming, clump-forming rosette flowers May to June and is somewhat evergreen. Good drainage and dry soil are essential, making this an excellent choice for the rock or trough gardens. Protect from mid-day heat. |

**Lonicera sempervirens** | 'Alabama Crimson' | Trumpet honeysuckle | 10-20' | ☜ | 🌿 | 1 gal | $8.00 |

Twining deciduous vine that is easy to grow and has multi-season interest. Orange-red flowers with yellow throats are produced in May through June and deep red berries can be showy in the fall. |

**Manfreda virginica** | Deciduous Agave | 8" | ☜ | 🌿 | 1 gal | $8.00 |

In mid summer, purple flower spikes appear from the basal rossette of foliage on this easily grown perennial. Rarely seen in gardens. Good drainage important. |

**Matteuccia struthiopteris** | Ostrich Fern | 3-5' | ☜ | 🌿 | 1 gal | $8.00 |

Stately fern for moist or wet shady places, where it will spread to form colonies when planted in the right spot. Erect, bright-green new fronds make a bold statement in the woodland. Shorter, spore-bearing fronds arise in summer. |

**Meehan's Mint** | Meehan's Mint | 6" | ☜ | 🌿 | 1 gal | $8.00 |

Use very good groundcover for the shade garden with small, heart-shaped leaves. Hooded, lavender-blue flowers appear in late spring. A non-invasive, mat-forming mint which serves as a great alternative to other shade groundcovers. |

**Mitchella repens** | Partridge Berry | 1' | ☜ | 🌿 | 1 qt | $5.00 |

An evergreen native groundcover seen in our local woodlands, but not nearly enough in our gardens. Pink-white flowers appear in June and July, followed by red berries that persist through winter.

Subtotal $ _______________

**Pruning Workshop**  
- $5 Member;  
- $10 Non-member  

TOTAL $ _______________

**CURRENT UDBG FRIEND?**
- Check box if you are a current member of UDBG Friends? If not, you can rejoin on the back of this form. See other side for membership details and form.

**SPECIAL OFFER FOR NEW UDBG MEMBERS**
- If you join as a first time member with this order form, you will receive a free perennial plant at pick-up.
What is the UDBG?
The University of Delaware Botanic Gardens is a research center, a laboratory, and a classroom in which studies in horticulture, landscape design, plant biology, botany, plant pathology, entomology, and wildlife ecology are pursued through experiential learning. UDBG maintains a diverse and dynamic living plant collection that stimulates and engages, with more than 3,000 species and cultivars of perennials, shrubs, and trees. UDBG provides a welcoming environment for visitors to learn about trees, shrubs, and other plants.

Who are the UDBG Friends?
The UDBG Friends, a membership organization, was organized to play a vital part in funding, volunteering, and helping with the further development of the UDBG. The Friends help UDBG establish new and improved programs for research, education, and natural beauty. Anyone with a lively interest in horticulture, education, landscape design, and nature is encouraged to join. As a member of UDBG Friends, you are a partner in the future of the gardens.

How can I join?
Please complete the membership form and return it with your annual dues. Membership year begins on the date that we receive your application. For more information, call UDBG at (302) 831-0153 or visit our Web page at: http://ag.udel.edu/udbg

How are the benefits of membership in the UDBG Friends?

- **Basic Benefits**
  - Notice of upcoming events
  - Discounted admission to events (workshops, lectures, tours)
  - Invitation to special-member events
  - Special mailings
  - Subscription to newsletter (3 times/year)
  - Early entrance to members’ hours during Plant Sale in spring and fall

- **$10 Student**
  - Basic Benefits
  - Free admission to UDBG semi-annual meeting lectures for student

- **$30 Individual**
  - Basic Benefits
  - Free admission to UDBG semi-annual meeting lectures for one family member

When a local Bartlett Tree Expert strolls under your favorite oak, he has the world’s most advance tree care technology in the palm of his hand: a computer link to the Bartlett Tree Research Laboratories and advance diagnostic tree science. What he also has is hand-on knowledge of local weather, soil, and environmental history. Bartlett Tree Experts and Bartlett Science protect the beauty, health, and value of one of the most important natural resources on earth — your trees.

The ELM (Environmental Landscape Manager) is one of the many Bartlett innovations and techniques in arboriculture that has helped Bartlett improve the landscape of tree care since 1907.
